Specifications :

Price	contact us
Brand Name	WeiHong
Place of Origin	China
Min.Order Quantity	1
Payment Terms	OEM?ODM?OBM
Delivery Detail	3-7days

Detail Introduction :

Calcium ammonium nitrate is used as fertilizer. Fertilizer grade CAN contains approximately 8% calcium and 21-27% nitrogen. CAN is better suited for use on acidic soils because it acidifies the soil less than many common nitrogen fertilizers.

CAN contains 27% nitrogen, 2.4% magnesium, and 5.3% calcium in the form of calcium magnesium carbonate (dolomite). It consists of dust-free, white, free-flowing particles

Why choose us?

(A) Stable quality, no customer quality complaints

(B) Timely delivery, delivery within 5 days for items below 500 tons

(C) An experienced logistics team ensures that the packaging is clean and complete and the bags are not broken during transportation.
