

Fiber CMC Rating

Specifications :

Price	contact us
Brand Name	WeiHong
Place of Origin	China
Min.Order Quantity	1
Payment Terms	OEM?ODM?OBM
Delivery Detail	3-7days

Detail Introduction :

Cellulose CMC is an odorless white flocculent powder with stable performance and is easily soluble in water. Its aqueous solution is a neutral or alkaline transparent viscous liquid, soluble in other water-soluble glues and resins, and insoluble in organic solvents such as ethanol. CMC can be used as a binder, thickener, suspending agent, emulsifier, dispersant, stabilizer, sizing agent, etc. The price of cellulose CMC ranges from four to five thousand to ten thousand yuan per ton. The lower the price, the lower the purity of the product. The quality and quantity of cellulose purchased by users are different, so the price will be different, that is, the better the quality, the higher the price, and vice versa, the lower the price; the more the purchase quantity, the lower the price, on the contrary, the price will increase relatively.
