

Shandong Cellulose CMC

Specifications :

Price	contact us
Brand Name	WeiHong
Place of Origin	China
Min.Order Quantity	1
Payment Terms	OEM?ODM?OBM
Delivery Detail	3-7days

Detail Introduction :

Shandong cellulose CMC is used in other industries:

- (1) CMC In detergents, CMC can be used as an anti-soil redeposition agent, especially for hydrophobic synthetic fiber fabrics, which is significantly better than carboxymethyl fiber.
- (2) CMC can be used to protect oil wells as a mud stabilizer and water retention agent in oil drilling. The dosage for each oil well is 2.3t for shallow wells and 5.6t for deep wells.
- (3) CMC is used as a sizing agent, a thickener for printing and dyeing paste, textile printing and stiffening finishing in the textile industry. Used in sizing agent can improve solubility and viscosity, and easy to desizing.
- (4) CMC is used as a paper sizing agent in the paper industry, which can significantly improve the dry strength and wet strength of paper, as well as oil resistance, ink absorption and water resistance.
- (5) CMC is used as a hydrosol in cosmetics and as a thickener in toothpaste, and its dosage is about 5%.
- (6) CMC can be used as flocculant, chelating agent, emulsifier, thickener, water-retaining agent, sizing agent, film-forming material, etc. It is also used in electronics, pesticides, leather, plastics, printing, ceramics, toothpaste, and daily chemicals And other fields, and because of its performance and use, it is constantly developing new application fields.
